Siddharth Singh

Frontend Developer | React.js & Next.js

Mumbai, India | imsidd02@gmail.com

linkedin.com/in/siddharth-s-singh | github.com/imsidd02 | imsiddharthsingh.vercel.app

PROFESSIONAL SUMMARY

Frontend developer with over 3 years of professional experience at a Mumbai web development company, building client websites and production web applications. Works mainly with React.js, Next.js and TypeScript. Recently built a quoting, booking and payments platform for a UK waste-clearance business as its sole developer, and is rebuilding a legacy PHP business directory on Next.js. Also delivers PHP, WordPress and jQuery work for client sites. Uses AI coding assistants (Claude Code) as part of the workflow, while owning the requirements, technical decisions, review, testing and debugging.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery

Forms & data fetching: React Hook Form, Zod, TanStack Query, REST APIs, AJAX

Backend & databases: PHP, WordPress, MySQL, PostgreSQL, Prisma ORM

Integrations & testing: Stripe, Resend, Nodemailer, Vitest

Tools: Git, GitHub, Vercel, Postman, Claude Code

PROFESSIONAL EXPERIENCE

Geecon Systems Pvt. Ltd., Mumbai, India

Associate Software Engineer — Apr 2025 – Present

- Develop production web applications with Next.js, React and TypeScript for client and internal projects, including booking and payment journeys, customer portals and admin tools (see Projects).
- Maintain and extend client websites with PHP, WordPress, AJAX and jQuery, including admin dashboard features.
- Take part in sprint planning and peer code reviews.

Trainee Software Engineer — May 2023 – Apr 2025

- Developed client-facing websites with WordPress, HTML5 and CSS3, turning designers' mock-ups into responsive, pixel-accurate layouts.
- Added interactive features and responsive UI components with jQuery and Bootstrap.
- Implemented authentication, content forms and WordPress plugin customisations.

Software Development Intern — Dec 2022 – May 2023

- Worked with senior developers on live projects, applying React.js, Next.js, Tailwind CSS and API integration.
- Created responsive layouts and reusable UI components, used Git in an agile team workflow, and helped with debugging and testing.

PROJECTS

Van-Go Clearance · van-goclearance.co.uk · client project — Aug 2026 – Present

Quoting, booking and payments platform for a UK waste-clearance business. Sole developer (AI-assisted with Claude Code).

- Designed and built multi-step booking journeys for each service, with postcode address lookup (Ideal Postcodes API), date and time-slot selection, and a running total that stays visible on mobile.
- Integrated Stripe-hosted checkout with payments confirmed by webhook and separate test and live keys, plus transactional email through Resend that never blocks a booking.
- Delivered a customer portal (bookings, quotes, downloadable PDF invoices) and a staff admin area (availability calendar, coupons, coverage areas, spreadsheet price imports with preview and one-click revert).
- Wrote unit and integration tests with Vitest (300+ test files) across booking, payment and admin code.

Tech: Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Stripe, Resend, Vitest

My Business Directory Local: Next.js rebuild · internal project, in development Oct 2026 – Present

Rebuilding a long-running local business directory (live today as a PHP site at mybusinessdirectorylocal.com) on Next.js, sharing the existing database so the old and new sites can run side by side. AI-assisted with Claude Code.

- Implemented 100+ pages and API routes, covering search and advanced search, categories, locations, business and member profiles, public forms, and a member dashboard for listings, opening hours, products and account details.
- Set up least-privilege database access (a read-only user for pages, a narrowly scoped write user for forms) and server-side ownership checks on every dashboard query.
- Added legacy-compatible password verification so existing members can sign in without resetting, plus redirects from old PHP URLs to the new routes.

Tech: Next.js 15, React, TypeScript, Tailwind CSS, MySQL

PMS 2025

- Developed the complete user interface and parts of the backend.

Tech: Next.js 15, TypeScript, Tailwind CSS, Zod, React Hook Form, TanStack Query, Prisma

Award Night Websites Apr 2025 – Present

- Developed multiple award-night websites presenting awards and contestants across different events.

Tech: PHP, MySQL, AJAX, JavaScript, jQuery, HTML5, CSS3, Bootstrap

B2B Growth Hub · b2bgrowthhub.org Apr 2024 – Present

- Implemented UI updates and improved the site's responsiveness across devices.

Tech: HTML5, CSS3, JavaScript, Bootstrap, PHP, SQL

Dev Aarti Sangrah · team project Jan 2025 – Mar 2025

- Contributed features to a Next.js and Sanity website: contact-form email delivery, a team-member section, policy pages, testimonials, site-wide language updates and About page UI fixes.

Tech: Next.js, TypeScript, Sanity, React Hook Form, Zod, Nodemailer, Tailwind CSS

EDUCATION

B.Sc. Computer Science, Shankar Narayan College of Arts & Commerce, Mumbai 2021
